INNOVATION-DRIVEN AGRIFARM MANUFACTURES AND INSTALLS STATE OF THE ART HOUSING SOLUTIONS + AIR CLEANING SYSTEMS FOR PIG- POULTRY AND DAIRY FARMERS

AgriFarm is an award-winning company, specializing in improving, developing and installing high-quality housing and air cleaning solutions.

AgriFarm has several times developed groundbreaking products through extensive research and consulting with costumers. Over the years,

AgriFarm have developed unique barn concepts and, in particular, a number of innovative environmental technologies that have received more awarding prizes, such as Agromek prices in respectively. 2009, 2012 and 2014 and the EU's environmental award in 2012.

COMPANY PROFILE

Officially founded in 2013 but with roots back to 2007, AgriFarm has proven to be one of the leading innovators when it comes to energy- and environmental friendly stable- and air cleaning solutions for pig-poultry and dairy farmers. The focus of the company is – besides the providing of class-act equipment – state of the art environmental solutions for improving productivity and decreasing economic costs in production. In 2009, the later known patented technology of “Environment Defender” was launched and has proven to be the beginning in AgriFarm’s search and focus towards more environmentally and technically focused solutions.

PRODUCTS

AgriFarm is working with 2 products – Intellifarm and Agri AirClean. Intellifarm is the housing system for pig- poultry and cattle, Agri AirClean is the air cleaning system to remove the pollution from the animal production, such as ammonia and odor.

Intellifarm – a cheap and extremely competitive housing for slaughter pigs. By the use of the self-innovated technology, Intellifarm is one of the world’s best and most profitable products for animal production, as it not only increases productivity, but by the use of hybrid ventilation systems and floor extractions, it ensures a minimal environmental impact.

Agri AirClean – a high effective air cleaner developed to clean air with high concentration of ammonia and odor. The air cleaner can remove up to 98% ammonia and up 88% odor from the polluted air handled in the air cleaner
