

## DANISH AGRO INDUSTRY | STABLE SOLUTIONS

**Big Dutchman is the world lead developer and producer of feeding facilities and stable equipment for modern pig- and poultry production. By offering both practical, economical and environmentally beneficial solutions, Big Dutchman gear farmers for future requirements.**

### COMPANY PROFILE

Dating back to the late 1930's, Big Dutchman has perfected their products over many decades. Covering five continents, present with e.g. sales offices in more than 100 countries and with approximately 2.400 employees worldwide, Big Dutchman has grown to be a highly recognized world-wide lead-supplier of stable equipment and solutions for future animal production. Specialized in the pig & poultry industries, Big Dutchman focuses its efforts in providing top-tier solutions with a long lifespan aimed at improving production economics, food-quality and strengthen the position of farmers in a highly competitive world-market.

### PRODUCTS

Big Dutchman's products are aimed at considerably improving livestock management, through well-thought, automated solutions. The environmental impact is sought minimized via innovations that both ease the everyday management and supply overview of the entire production line. The overview is provided via Big Dutchman's BDS remote app where farmers can access, analyze and adjust accordingly to the newest production data gathered from around the farm. In the newest era of farming, cost-improvement is a vital tool in fighting falling output prices, why being able to make even the smallest adjustments in the production is necessary – and Big Dutchman providing these solutions, is why they continue being a renowned market leader.

The product range consists of:

The products range widely as Big Dutchman supply both poultry and pig farmers. These examples therefore represent only a miniature selection of the entire catalogue:

- Feeding solutions (troughs, automated systems etc.)
- Climate & air management
- Turnkey inventory
