

DANISH AGRO INDUSTRY | STABLE SOLUTIONS

BoPil delivers a wide range of feeding solutions for both the pig, poultry, horse, and aqua industry.

COMPANY PROFILE

BoPil A/S has offered feeding solutions for the agriculture since 1991. The company is specialized in designing large scale production systems, while advocating a continuous adoption of new technology and best practice. While implementing systems that are easy to implement and operate, BoPil helps its customers by enabling cost reduction through technology adoption.

The company has a nationwide service- and support team, which provides 24/7 support on all minor or critical issues. Throughout the implementation process, BoPil provides extensive product training and ensures that the systems are running smoothly as a part of the handover process.

BoPils mission is to increase productivity and performance in collaboration with customers and partners, while at the same time caring for the welfare of the animals.

PRODUCTS

BoPil intends to deliver solutions of a long-lasting quality, not only technically, but also with the changes of tomorrow in mind.

The products are adjusted to the latest changes in legislation or market and includes software systems, farrowing pens, and feeding systems for pigs, poultry, horses, and aquaculture.

The project range consists of:

- Pig: Automatic feeding and straw systems, farrowing pens, Liquid feeding, Siloes, ESF and precision feeding stations for trials etc.
- Poultry: Complete feeding, heating and water systems
- Horse: Feeding Stations
- Aqua: Automatic feeding system, Smolt Feeder, Feed Transport, Silos
