

DANISH AGRO INDUSTRY | STABLE SOLUTIONS

Danish Farm Design is a consulting company specializing in development of livestock projects

COMPANY PROFILE

Danish Farm Design was founded in 2004 and has offices in Odense and Holstebro. The company is specialized in planning, design and management of pig production but is also providing consultancy for development of dairy production, grain storage, and feed mills. Danish Farm Design also develops business and masterplans for livestock projects and aims to be the leading international consulting company in pig and dairy farm production while applying the latest know-how and creating innovative solutions.
