

## DANISH AGRO INDUSTRY | STABLE SOLUTIONS

**Gråkjær is a lead-developer and installer of state of the art agricultural building solutions. Specialized in stalls for pig production, Gråkjær offers some of the newest and most efficient production facilities, prepared and developed for tomorrow's welfare- and production standards.**

### COMPANY PROFILE

With 40 years in the construction industry and more than 3,700 completed projects, Gråkjær is no doubt capable of providing quality constructions on time – and at the right price. They mainly offer full-scale total solutions – sketched and tweaked to match all the specific needs of the customers. Gråkjær handles all of the construction planning and management, to ensure that every step is carefully supervised. This unique combination of a large production but a yet close and thorough relationship with the customers, has brought Gråkjær to be one of Europe's largest manufacturers of turnkey solutions – not only for agriculture, but also for industry and aquaculture.

### PRODUCTS

With years and years of experience, Gråkjær offers turnkey agricultural production facilities. Besides designing and manufacturing specific customer-requests, they offer their “Welfare stable” which takes pig/sow-farming to new heights. The Welfare stable is innovative and designed for the future of farming, by being designed in a way that benefits both animals, employees and the environment. A combination that in the end provides improved finances and economics of production.

The project range consists of:

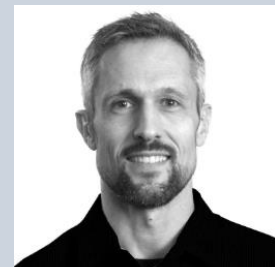

Gråkjær offers a wide array of products, ranging from consultancy services in starting projects to installment and finalizing of turnkey solutions.

- Turnkey agricultural buildings
- “Welfare production facilities for pigs”
- Project designs
- Customer-requests
