

DANISH AGRO INDUSTRY | STABLE SOLUTIONS

JH Agro A/S is a manufacturer and distributor of slurry acidification systems and automatic bedding distribution systems

COMPANY PROFILE

JH Agro A/S, founded in 1983, started out with maintenance and repair services. The company has developed since then, and is now developing its own products. The focus is to provide added-value and environmental value to farmers; through innovation, efficiency and customer focus. The target is to be the leading supplier of slurry acidification technology and automatic bedding and feeding, and the main market area is Europe.

PRODUCTS

The company's own products include automatic bedding distribution, JH MiniStrø, launched at Agromek in 2009. The slurry acidification system, JH Acidification NH4+, was launched in 2009/2010.

The product range consists of:

- Slurry acidification
- Automatic bedding distribution
- On-site repair and maintenance services (only DK)
- Slurry handling
- Feeding systems and silos
- Components for biogas installations
