

## DANISH AGRO INDUSTRY | STABLE SOLUTIONS

***Jyden is focusing on development, production and design of housing solutions for both cattle and pig productions. In addition, Jyden has several popular niche products for sheep and poultry sectors. Jyden is interested in supplying and partnering with Chinese companies to provide customized, strong solutions made for growth in the farming business.***

### COMPANY PROFILE

Jyden was founded in 1923 and has since then developed into a major international company with a comprehensive product range for housing equipment, feed and transport systems, water systems and flooring, ventilation, air cleaning, LED-lighting and much more. Jyden's key area is to provide customized, strong solutions made for growth in farming business. This is based on innovative solutions which - besides meeting the general needs – are moving a step further in terms of working environment, animal welfare and energy optimization.

### PRODUCTS

With a strong focus on innovation and technology, Jyden is - in collaboration with professional farmers and research institutes – a trend-setting company that sets up new standards for indoor mechanization. Jyden is thinking the future of animal production and thus becoming one of Europe's largest suppliers of full-line solutions for modern animal housing.

The product range consists of:

- Animal Housing
- Feeding Systems
- Water Systems
- Flooring
- Ventilation
- Heating
- Air Cleaning
