

DANISH AGRO INDUSTRY | STABLE SOLUTIONS

KJ Klimateknik A/S is a supplier of climate and farm management solutions.

COMPANY PROFILE

KJ Klimateknik A/S supplies environmental, electronics and services related to livestock production. The company is located in Thorning near Kjellerup and was established in 1989 by Kaj Johansen. It has been owned by Allan Pedersen since 2016 and employs 20 people.

KJ Klimateknik A/S is a small and powerful organization with a short chain of command and great flexibility. The company has production sites in Denmark, the Netherlands, Slovenia, and Italy and emphasizes the importance of innovation.

The company offers solutions for animal housing, especially for pig and poultry production as well as aquaculture and industrial sectors. KJ Klimateknik A/S is striving to develop systems that protect the environment, while minimizing power consumption and ensuring good conditions for animals and humans.

PRODUCTS

KJ Klimateknik A/S has its own electronics department that develops and produces user-friendly electronic equipment and software. The company has great experience in: Air conditioning for stables, monitoring and alarm systems for livestock production, and servomotors with automatic control for ventilation in stables.

The project range consists of:

- Climate controls
- Monitoring and alarm systems
- Actuator motors
- Exhaust systems
- Air intake solutions
- Sprinkler systems
- Lair opener
- Heating and cooling
- Feeding systems
