

DANISH AGRO INDUSTRY | STABLE SOLUTIONS

Cormall A/S is a Danish company with the main area of activity within diet mixers for cattle feeding, straw processing machinery and biomass technology.

COMPANY PROFILE

Cormall was founded in 1961, producing only a simple steel plate grinding mill. Since then the company has grown and now offers a range of different products for the agricultural sector. Through the years Cormall has delivered equipment to several areas within the sector and therefore has a big experience and knowhow. Today Cormall's products is sold all over the world.

PRODUCTS

In the beginning of the 1970 Cormall specialized in constructing mixers for cattle feed. Through 1990's Cormall developed a control system and equipment for the mixer to be used for full automatically feeding. This has been a big advance for their customers, because of the optimization possibilities.

Furthermore, Cormall has developed and expanded the technology, and it is now used for a variety of productions: building materials, fuels, biological processes, animal bedding etc.

The product range consists of:

- Feed mixer Multmix
- Automatic robot or belt conveyer feeding systems
- Straw: conveyer, twine removal, bale breaking and milling
- Straw dust extraction and purification
- Biomass dispenser and loader for biogas
- Large feed kitchen's for bigger dairy farms 2000+
