

## DANISH AGRO INDUSTRY |

**RENO is one of the leading manufacturers and suppliers of compressed air solutions and high-pressure cleaners for professional and industrial use.**

### COMPANY PROFILE

As a manufacturer and supplier of air compressors since 1952 and high-pressure cleaners since 1978, RENO represents a piece of Danish industrial history. Today the company is the largest manufacturer of air compressors in Scandinavia and possess an extensive knowledge within this area. Together with years of collaboration with both dealers and users, they have developed the largest product line in the industry to accommodate the needs of every customer.

When it comes to service, RENO also have a lot to offer. They strive to ensure that their customers have a trouble-free operation with their compressed air equipment, with 24 hours service and service vehicles equipped with a mobile stock. In Denmark they have a response time for emergency cases of maximum 2 hours.

### PRODUCTS

RENO offer a wide range of compressed air products for industrial use and develop both standard solutions and customer-specific solutions according to our customers' needs and requirements.

The product range consists of:

- Piston and screw compressors
- Compressed air treatment
- Controllers
