

DANISH AGRO INDUSTRY | STABLE SOLUTIONS

A/S S. A. Christensen & Co. develops, manufactures and sell complete milking solutions with more than 80 years of experience.

COMPANY PROFILE

A/S S.A. Christensen & Co. is founded in 1938 by the first generation of the S.A. Christensen family with a vision of doing the best for cow, milk and the milker. Today's owner Steen A. Christensen is the third generation in the family to continue to run the company with the same strong values. The company has a strong focus on high quality, animal welfare, and environmental sustainability. The company has a Research & Development center in its headquarters in Denmark, as well as one in the Netherlands that has more focus on data-driven and robotic milking technology. The network of dealers consists of approx. 100 dealers.

PRODUCTS

SAC offers complete milking solutions for obtaining the highest possible milk yield with the best possible quality – both more traditional as well as automatic milking solutions. The milking solutions are suitable for all sizes of herds as well as all types of farms based on their needs. SAC supports the dairy farmers around the world all the way from design and placement of the parlour to the optimizing of the daily work. It is important to keep the installation milking which is why the company has a global hotline that ensures low response-time and quick problem-solving.

The project range consists of:

Traditional dairy solution

- Side-by-side 90 degree
- Herringbone 60 degree
- Swing-over (60 degree – 90 degree)
- Herringbone 30 degree
- External rotary
- Tie-up parlour
- Management system

Robotic dairy solution

- RDS FUTURELINE ELITE

Sheep and goat milking solution

- External rotary
- Side-by-side
- Management system
