

# DANISH AGRO INDUSTRY | STABLE SOLUTIONS

*Vissing Agro A/S is a developer of products for the pig industry.*

## COMPANY PROFILE

Vissing Agro A/S produces equipment for pig production and sells to both the Danish and International markets.

For more than 40 years, Vissing Agro has been synonymous with a healthy, Danish company that is constantly working on the development and optimization of products for pig production in the world.

The company's own development department ensures that they are up-to-date with the latest technology and proactive in meeting future requirements for the pig industry.

## PRODUCTS

The products include equipment for gestation, feeding, finisher, farrowing, and mating in the pig industry. Vissing Agro A/S makes stable solutions for sows, gilts and boars designed to provide maximum stability. The free access stall is the strongest construction in the market and is designed to give the sow freedom and to make it easy to do insemination in the box.

Vissing Agro A/S is the sole distributor in Denmark of feeding systems from the well-renowned Italian manufacturer of conveying systems for animal feeds, AZA International.

The farrowing pens are designed to give the sow and the piglets enough space and securing optimal conditions for the piglets.

The project range consists of:

- Gestation
  - Free Access Stall
- Feeding
  - MAXI+ MAXI+ Twin VissingMat 100 VissingMat 60
- Finisher
  - Finisher Pen, Two-Climate Pen, Compact Line
- Farrowing
  - Farrowing Pen, FT-30 Farrowing Pen, OPTI-Farrow Pen
- Mating
  - Confine box
